

Patient Group Update 8th July 2021

(Edited version available to all Patients on our website)

Introduction from Dr Anil Shah

As we operate 'out of' the second significant wave of the Covid pandemic, it is great to see the progress that has been achieved with the local response to the Covid vaccination.

Our Practice and wider Network teams have been supporting the uptake and providing our Patients with the information they need to make informed decisions about receiving the vaccine

It is now open to everyone over the age of 18 and we know this is the one tool that can help us all 'get back to normality'

We wanted to provide you an update on a few key areas:

- ✓ Coronavirus - Vaccination update
- ✓ Long Covid
- ✓ New Support Service for Newham Residents – 'Connect Newham'
- ✓ The National GP Patient Survey
- ✓ The NW2 Primary Care Network team
- ✓ What's on the Primary Care Agenda?

Coronavirus Vaccination Programme

The last 6 months has seen a growing focus on the UK National vaccination programme and the Practice teams at Stratford Health Centre and The Forest Practice have been supporting our patients in raising awareness, answering queries and booking vaccinations at our local hubs.

It was important that we reached out to our more vulnerable patients initially and we are now at the stage where all adults over 18 are eligible to take up the offer of the two-dose vaccination.

Across Newham there are now several vaccination sites and vaccines available daily by appointment as well as a number of 'walk in' services. The Borough has also trialled 'mass vaccination' sites such as the Olympic Stadium to maximise uptake. Sir Ludwig Guttman Centre, Essex Lodge and East Ham leisure centre are our main sites with some local GP Practices also offering vaccination appointments.

Locally, all GP Practices are being monitored on vaccine performance on a daily basis and a structured call / recall process has been in place and is very much part of our daily routine.

Undecided Patients have been contacted at least 3 times and then marked as 'declined' if still not wanting to take up the offer.

(Latest data to 24th June 2021 by Patient Cohort – indicating first and second dose coverage)

Newham Cohort Summary

Vaccination by Cohort & Dose

Of course, the Delta variant of the Coronavirus has been a concern and the sudden increase in positive cases has been noticeable at Practice level.

Undecided Patients have been contacted at least 3 times and then marked as 'declined' if still not wanting to take up the offer.

Our clear recommendation remains that every eligible adult takes up the offer of a vaccination

Our Practice stats

	Stratford Health Centre	The Forest Practice
Patients tested for Covid-19 infection	1755	1961
Patients confirmed with Covid-19 infection	444	553
Deaths of patients who had Covid-19 infection	3	5
Patients who had 1st Dose Only	1317	967
Patients who had both doses	1899	2232

Long Covid

What is 'Long Covid'?

- **Highly debilitating for many sufferers, Long COVID is an increasingly widespread, multi-system condition.** Regardless of the severity of their initial illness, it appears that anyone of any age – including children - can experience Long COVID.
- **The term 'Long COVID' includes both *ongoing symptomatic COVID-19* (5-12 weeks after onset) and *Post-COVID-19 Syndrome* (12 weeks or more).** It is associated with a wide range of different symptoms impacting physical, psychological and cognitive health. It can also have an effect on quality of life and ability to work or attend education.

A number of resources are available for patients online - www.yourcovidrecovery.nhs.uk

Where appropriate – our clinical team may refer Patients to a long covid assessment clinic

Practices are being targeted to support Long Covid and ensure patients are receiving the appropriate support

'Connect Newham' – new chat service for residents

New befriending service for Newham residents

As we move out of lockdown, many residents will find it hard to adapt to the new rules and new way of living. Whether it is coping with the loss of a loved one, dealing with a change in financial circumstances or simply missing regular conversation with friends and family.

These are difficult times, and it can be hard to connect with others. Sometimes having a friendly chat with a new person who takes an interest in them and their life can help with feeling positive and better connected to others in the community.

We would like to introduce a service that recently launched – **Connect Newham**. Connect Newham is a weekly or fortnightly chat service for residents (over 18 years old).

**Do you miss regular conversation?
We can help.**

It can feel difficult to connect with others and sometimes having a friendly chat with a new person who takes an interest in you and your life can help with feeling positive and better connected to others in the community.

Connect Newham is a weekly or fortnightly chat service for residents in Newham.

Who it's for?

For anyone 18+ living in Newham who feels isolated or lonely for whatever reason.

How does it work?

It is easy, safe and all from the comfort of your own home.

1. Over the phone you can tell us a little about yourself and decide how many calls you would like.
2. We match you with a fully trained befriending volunteer for a weekly or fortnightly chat over the phone at a time that's convenient for you. Befriending can range from between 3 to a maximum of 20 calls.

Get Started

Call us on **020 3954 3224** to get connected with one of our volunteers.
Email: contact@connectnewham.org.uk

HT, was referred to Connect Newham by a social prescriber. He was feeling very upset and low due to the sudden death of a close relative recently. We connected him to a local bereavement service and a volunteer befriender who rings him every Tuesday. HT's mood has improved since the first call and he says that he looks forward to having a warm friendly chat each week.

It's good to talk

Patients can be referred from their GP Practice or a self-referral can be made by calling 0203 954 3224

Our Primary Care Network

Newham North West 2 Primary Care Network

Dr Samuel & Dr Khan Practice | East End Medical Centre

Stratford Health Centre | The Forest Practice

Upton Lane Medical Centre

Our well-being team of Social Prescribers, Dietitian, Physician Associates and Pharmacy Technician have been supporting access to patients and across our Practice Network this has resulted in over 5,000 extra Patient contacts since January. The team have also supported a number of initiatives over the last few months focusing on patient education / awareness in a number of areas. These have included:

- Summer 2021 – Over 80's well-being project
- June 2021 – Learning Disability Week
- June 2021 – Carer's week
- April 2021 – On your Feet Britain
- March 2021 – National No Smoking Day
- December 2020 – Alzheimer's Awareness
- September 2020 – Macmillan Cancer Support

Annual GP Patient Survey

The National GP Patient survey commissioned by NHS England has just been published (8th July 2021) and every GP Practice is surveyed against the same criteria enabling benchmarking against National and Local average performance.

As a Practice team we will need to review the detailed results, share these with the teams and pull together a comprehensive Action Plan to focus on supporting the improvement opportunities identified.

We have provided a 'snapshot' of the results and the full survey can be found at <https://gp-patient.co.uk>
